Meta Connect and the launch record, 2014 to 2026

Internal briefing note, compiled 4 November 2026 from public announcements. Dates are keynote dates; prices are US launch prices.

2014 to 2019: Oculus Connect

The first Oculus Connect developer conference opened on 19 September 2014 at the Loews Hollywood Hotel in Los Angeles, six months after Facebook agreed to buy Oculus VR of Irvine, California for about 2 billion dollars. The Crescent Bay prototype was shown there. Oculus Connect 2 returned to Hollywood on 23 September 2015 with the Gear VR consumer launch.

From 2016 the conference moved to the San Jose McEnery Convention Center. Oculus Connect 3 on 6 October 2016 priced the Touch controllers at 199 dollars; Connect 4 on 11 October 2017 announced Oculus Go at 199 dollars and showed the Santa Cruz standalone prototype; Connect 5 on 26 September 2018 revealed Oculus Quest at 399 dollars; Connect 6 on 25 September 2019 added hand tracking and Oculus Link, and the Horizon social platform was announced.

2020 to 2022: virtual years

Facebook Connect on 16 September 2020 was held online from Menlo Park, California, and launched Quest 2 at 299 dollars, which became the best selling headset of the period. On 28 October 2021, again online, Mark Zuckerberg renamed the company Meta Platforms and set out the metaverse strategy. Connect on 11 October 2022 launched Meta Quest Pro at 1,499 dollars.

2023: Menlo Park

Connect returned to an in-person event on the Menlo Park campus on 27 September 2023. Meta Quest 3 launched at 499 dollars and the Ray-Ban Meta smart glasses, built with EssilorLuxottica of Milan, replaced the earlier Ray-Ban Stories at 299 dollars. Meta AI, the assistant built on Llama 2, was announced for WhatsApp, Messenger and Instagram.

2024: Orion

On 25 September 2024 at Menlo Park, Meta showed Orion, a working pair of augmented reality glasses with a neural wristband that was not offered for sale, and launched Quest 3S at 299 dollars. Llama 3.2 added vision models the same day. Earlier in the year Llama 3 had shipped on 18 April 2024.

2025: LlamaCon and Ray-Ban Display

LlamaCon, the first developer conference for the Llama models, ran on 29 April 2025 in Menlo Park and launched the standalone Meta AI app. Llama 4 Scout and Maverick had been released on 5 April 2025. Oakley Meta glasses were announced on 20 June 2025.

Connect 2025 on 17 September 2025 in Menlo Park introduced Meta Ray-Ban Display, the first consumer glasses with an in-lens display, at 799 dollars with the Meta Neural Band, plus Ray-Ban Meta Gen 2 and Oakley Meta Vanguard. Meta Superintelligence Labs had been formed on 30 June 2025 after the 14.3 billion dollar investment in Scale AI of San Francisco.

2026: Muse

Muse Spark, the first model from Superintelligence Labs, was released on 8 April 2026 and now powers the Meta AI assistant. Muse Glimmer, a 30 billion parameter open weights model, followed on 10 August 2026, with Muse Code, a terminal coding agent, later that month and the Muse agent app in September. Muse Wonder, the deep reasoning model, was released on 12 October 2026.

Connect 2026 ran on 23 and 24 September 2026 in Menlo Park. Ray-Ban Meta Gen 3 launched at 449 dollars, the camera-free Ray-Ban Meta Audio glasses were announced at 349 dollars for 13 October, VR glasses were previewed at 1,299 dollars for spring 2027, and the Muse Charm keychain and the Wearables Device Access Toolkit 1.0 were introduced. On 19 October 2026 Meta engineering described Prometheus, the gigawatt supercluster in New Albany, Ohio, that trains the Muse models.
